

Stand-alone VMP

Autonomous VMP for parcel shelf

Article number : 30960

The VMP (Variable message panel) allow to relay information or warnings to road users but also to pass alert messages on to population.

Very readable, messages are quickly understandable by drivers. It allows to display day and night up to 100 messages. 7 languages can also be added to communicate with people from different European countries. Messages can be modified or adapted thanks to a PC software. They can be programmed for a fixed, flashing or scrolling display.
