

Topometre Option

For roof systems with XXL graphic control panel

Add the Topometer function to your roof systems with Mercura XXL graphic control panel.

- Easily connected and user friendly
- No need for sensors (information obtained via the vehicle's CAN network)
- Distance measurement to the front and in reverse
- Example: used to establish the spacing between warning cones
- Compatible with Mercura roof systems (manufactured from 2012)
- Automobile connectors supplied
- Electronics : EMC R10 approved

Uses:

- Topographical readings
- Site measurements
- Installation of temporary signage
- Road markings
- Road maintenance
