

EPA

Portable Warning Device

Alert the population !

Mercura's EPA, Portable Warning Device, has been designed for communities with a local emergency action plan.

The device is a simple, mobile, audio and visual warning system, used to inform the population of danger.

The EPA consists of an amber flash beacon, a powerful siren and our SPA NANO device enabling message recording and broadcasting.

It is light-weight, quick and easy to set up on all types of vehicles: no installation costs!

Designation	#article
Portable Warning Device	27780
